

FCC:

I am a Flight Attendant for a major U.S. airline. The proposal to allow cellphone use by passengers on commercial aircraft during flight should NOT be allowed. The following are just a few of the reasons why:

- * There is no hard evidence that cell phone use doesn't interfere with navigational instruments.
- * Cell phone use would enable terrorists to coordinate a plan of action more effectively.
- * The NPRM would leave it up to flight attendants to police the use of cell phones onboard the aircraft compromising our ability to maintain a safe, secure cabin environment and to conduct emergency evacuations.
- * It would make an already tense cabin environment even more stressful.

I urge you to defeat this proposal. Its defeat will ensure we continue to provide the best security measures possible to prevent another tragedy like 9/11 from ever happening again.

It's in your hands...

Sincerely,

Louis C. Kielton
